Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims *1, 3-6, 8-18, 20-22* are rejected under 35 U.S.C. 102(b) as being anticipated by Devanagundy et al, US. Pat. No. 6,148,384.

3. Claims *1, 6, 9, 12, 15 and 18*, Devanagundy teaches a revision identification register that allows modification of the revision identification register contents [*abstract, col. 1, line 66 thru col. 2, line 2*];

a revision identification modification register, the revision identification modification register allowing modification of the revision identification register contents when indicated by the contents of the revision identification modification register [*col. 2, lines 14-17, col.9, lines 40-41*].

4. Claims *3, 10, 13, 16 and 20*, Devanagundy teaches the revision identification modification register includes a single bit, the state of the bit indicating whether the contents of the revision identification register are currently modifiable [*col. 2, lines 13-14*].

5. Claims *4-5, 8, 11, 14, 17, 21-22*, Devanagundy teaches a value of "1" in the revision identification modification register indicates that the revision identification register will accept any value written to the revision identification register and a value of "0" in the revision identification modification register indicates that the revision identification register will ignore

any writes to the revision identification register [*Devanagundy teaches a protection bit in the control register being set prevents writing or erasing in the corresponding portion of the SEEPROM, col. 3, lines 30-48*].

Response to Arguments

6. Applicant's arguments with respect to claims 1, 3-6, 8-18, 20-22 have been considered but are moot in view of the new ground(s) of rejection.
